Boone County Deed Index

All dates listed are the date of the drawing of the instrument. Many waited years had passed before actually filing, thus researchers cannot rely on the filing date as denoting early land transactions.

The listing of the deeds was transcribed from a microfilmed copy of the original indexes. Many names were very difficult to 'decipher' and no doubt researchers and family members will find these. If possible we would appreciate hearing in order that we may correct spellings for future printings.

Researchers will beware of the names; Daley which could well be Duley or Doley? The Kincaid family name was recorded various ways. These we feel are all members of the same family. The letters, "H" and "N" were made almost identical, as were "S" and "G" and the "S" and "L" when capitalized. The smaller letters, "a" and "o" .. "r" and "n" ..so researchers should ignore when a wrong initial appears in our text and check the original for accuracy.

As in all books of this nature, there is little room for deeds that need explanation or for the listing of the type of transactions. We have provided a listings of 'See # ??' for the details and this listing will be found on the following pages.

For the type of deed we have used the following abbreviations;
