LDS FAMILY HISTORY CENTER

It Takes Money to Farm These Days . . .

When Grandfather was a boy, all he needed to start farming was a team, wagon, plow and a few other inexpensive farm tools. Today's modern farming methods require considerable capital for equipment. Power farming machines have replaced many farm workers—but they cost money. Lime and fertilizer greatly boost crop yields, but it takes money to buy them. Livestock offers Howard County Farmers the safest and soundest system of farming—but again capital is needed.

Thus, today one of the farmer's most important and useful tools is agricultural credit. Our bank, a home institution, can supply your needs. We are in business to serve the needs of the Howard County Community.

Perhaps you have heard it stated that "The soil is like a bank, you can't keep on writing checks without making deposits." The comparison is obvious. The agricultural future of our county depends on the soil fertility "balance" maintained on our farms.

Missouri's Balanced Farming program has gained national attention because of the success of the program, which produces a plan of operations for all activities on the individual farm. Our bank can play an important role by putting Balanced Farming Plans into operation on Howard County farms.
