Introduction

The information contained in this book was obtained from the Original Plat and Tract Books which are in the County Clerk's office in Rolla.

The Tract Book was created in 1858, from information provided to Phelps County by Crawford, Maries, and Pulaski Counties. The information was obtained from United States Tract Books issued to the latter counties by the U.S. Land Offices in St. Louis and Jackson, MO. It was intended to show the original purchasers only. At some point, someone updated the Phelps County Tract Book with some of the later purchasers. However, this was randomly done.

The Plat Book was created from the information in the Tract Book and it was also randomly updated.

Because of the updating of the information in both books the information was inconsistently organized. For Example:

1. Land entries for Townships 34 through 37 contained the original land owners and patent numbers, with only occasional additions for later land entries. In most cases, the Tract Book and Plat Book agree.
2. Entries for Townships 38 and 39 were from Maries County. These entries did not reflect patent numbers. It appears that the information was for land owners at the time of the transfer of land to Phelps County, rather than the original land owners, except in cases where the original owner still owned the property.
 - a. Care was not taken in the original books to insure proper spelling of names. In some cases the first names do not agree.
 - b. In some cases it cannot be accurately determined if the land entries were made in the proper Section/Township/Range.
3. If a date is indicated by a year only, it could be the year the land was purchased, or the date patent was issued. If the date is complete, it is either the date the patent was issued or the date that purchased from the original owner.
4. In this book Township 38 and 39 will have separate section listings for the Tract and Plat books, if major differences were found in the original.

This book is intended to provide information for a starting point for other records searches. Additional information can be obtained from the U.S. Department of the Interior if you know the patent number. Additional information might be available from the Missouri Archives in Jefferson City as the State was responsible for later land sales.

Also, when this information was transcribed it was necessary for me to type it on a typewriter. Because of time limitations it was not possible to organize the information alphabetically, nor was the preparation of an index convenient. I hope in the future I will be able to provide one but other projects prevent it at this time. I sincerely hope you find the information provided to be helpful.
